PERFORMANCE IS OUR MISSION

DUAL CORE

How it works?

By sandwiching a softer plastic core within more rigid plastic we are able to drastically enhance elastic tension. As you drive and flex into your boots, Dual Core actively compresses and expands – harnessing potential energy to deliver explosive power, snap and rebound.

SKIER BENEFITS:
 MORE POWER & RESPONSIVENESS
 PROGRESSIVE & CONSISTENT FLEX

Dualcore (LANGE)

- 1. COMPRESSION**
The softer core of the boot absorbs energy.
- 2. TENSION**
Hard outer layers create tension.
- 3. EXTENSION**
The constant interaction of the 2 layers transfers the energy to and from the ski.

FIT IS OUR OBSESSION

Liners adapted to your morphology and ski practice.

At Lange, performance and comfort go hand in hand. Performance is nothing without comfort, and comfort is nothing without performance. Offering a boot that both respects the morphology of your foot and adapts perfectly to your discipline is our obsession. This is why, thanks to the unique know-how of our engineers and our 60 years of expertise in the world of ski boots, Lange is the only brand able to offer more than 50 different liners, all of which adapt to different morphologies and disciplines. Our boots are both rigid and high-performance, while remaining comfortable and adapted to your body shape.

Choose the volume adapted to your morphology and practice:

Easy Entry and Exit

A softer plastic insert molded over the instep area allows easier opening of the boot overlap for more comfortable entry and exit.

SHADOW

PERFORMANCE

The 1st assisted performance system

SUSPENSION BLADE & DUAL PIVOT

- Enhanced leverage = more power with less effort
- Suspension absorption and vibration damping
- Increased rebound
- Consistent flex

+26% REBOUND
WITH LESS PHYSICAL STRENGTH

Mechanical advantage leverage

TRADITIONAL SKIBOOTS

Concentrated fixed points

NEW SHADOW SKIBOOTS

Mechanical Advantage leverage

- Wider gradual power zone
- More arc in flex pattern movement
- Relies more on plastic & distortion

- Shorter amplified power zone
- More linear movement
- Less distortion flex

ASSISTED PERFORMANCE EFFICIENCY :
LESS FORWARD MOVEMENT WITH AMPLIFIED ENERGY & POWER TRANSMISSION
